## Subject index

### Methods and constructs

#### Theoretical

##### *Computational methods for electronic structure*

- Site-specific phenomena in Si:2p core-level photoionization of  $X_3Si(CH_2)_nSi(CH_3)_3$  ( $X = F$  or  $Cl$ ,  $n = 0–2$ ) condensed on a Si(111) surface, S. Nagaoka, K. Mase, M. Nagasono, S. Tanaka, T. Urisu, J. Ohshita and U. Nagashima 249 (1999) 15
- A universal basis set for cations and anions generated with the generator coordinate Hartree–Fock method, F.E. Jorge and P.A. Fantin 249 (1999) 105
- The aniline–argon van der Waals complex: ab initio second-order Møller–Plesset study of the potential energy surface in the ground electronic state, I. López-Tocón, J.C. Otero, M. Becucci, G. Pietraperzia and E. Castellucci 249 (1999) 113
- Theoretical studies on the electronic spectrum of linear  $C_6$ , M. Hanrath, S.D. Peyerimhoff and F. Grein 249 (1999) 121

##### *-Cl and valence bond approach*

- The electronic states of propyne studied by optical (VUV) absorption, near-threshold electron energy-loss (EEL) spectroscopy and ab initio multi-reference configuration interaction calculations, M.H. Palmer, C.C. Ballard and I.C. Walker 249 (1999) 129

##### *-density functional theory*

- A new interpretation of the IR spectrum of H(D)Cl complexed with dimethyl ether from a supersonic jet-FTIR experiment, P. Asselin, P. Soulard, M.E. Alikhani and J.P. Perchard 249 (1999) 73
- Theoretical studies of dissociation pathways on the ground state potential energy surface for  $HXGeO$  ( $X = H, F, Cl$ , and  $Br$ ), C.-L. Lin, M.-D. Su and S.-Y. Chu 249 (1999) 145
- DFT calculation and matrix isolation FTIR studies on the formation of  $CF_3OBr$  from  $O(^1D)$  and  $CF_3Br$  in solid argon, L. Zhang, X. Wang, M. Chen and Q.-z. Qin 249 (1999) 161
- Structure, bonding and formation of molecular germanium oxides, hydroxides and oxyhydroxides, J.R.T. Johnson and I. Panas 249 (1999) 273

##### *Semiempirical methods*

- Radiative and nonradiative electron transfer in donor–acceptor phenoxazine and phenothiazine derivatives, P. Borowicz, J. Herbich, A. Kapturkiewicz, M. Opallo and J. Nowacki 249 (1999) 49
- Superposition model for  $^{19}F$  isotropic chemical shift in ionic fluorides: from basic metal fluorides to transition metal fluoride glasses, B. Bureau, G. Silly, J.Y. Buzaré and J. Emery 249 (1999) 89

*Spin states and magnetic interactions*

- Theoretical study of the electron-spin magnetic moments (*g*-factors) of  $F_2^-$  and  $Cl_2^-$  ( $X_2^-$ ), as well as  $MX_2$  and  $M_2X_2^+$  compounds with  $M = Li, Na$ , P.J. Bruna and F. Grein 249 (1999) 169

*Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)*

- Alignment determination of symmetric top molecule using rotationally resolved LIF, S.-L. Cong, K.-L. Han and N.-Q. Lou 249 (1999) 183

*Photon states and statistics*

- Alignment determination of symmetric top molecule using rotationally resolved LIF, S.-L. Cong, K.-L. Han and N.-Q. Lou 249 (1999) 183

*Scattering of waves and particles*

- A semiclassical study of vibrational and rotational transition in  $He + H_2$  at suprathermal energies, K. Sakimoto 249 (1999) 1

*Collisional and reactive molecular dynamics with non-frictional forces*

- A semiclassical study of vibrational and rotational transition in  $He + H_2$  at suprathermal energies, K. Sakimoto 249 (1999) 1

*Quasiparticle dynamics (incl. excitons, polarons)*

- Frenkel excitons in disordered chromophore complexes: Theory of optical absorption of Langmuir–Blodgett layers including pheophorbide-a, R. Scheller and V. May 264 (1999) 191

**Experiment***Magnetic resonances*

- Superposition model for  $^{19}F$  isotropic chemical shift in ionic fluorides: from basic metal fluorides to transition metal fluoride glasses, B. Bureau, G. Silly, J.Y. Buzaré and J. Emery 249 (1999) 89

- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201

*Molecular spectroscopy*

- Delayed luminescence of the ladder-type methyl-poly(*para*-phenylene), Yu.V. Romanovskii, A. Gerhard, B. Schweitzer, R.I. Personov and H. Bässler 249 (1999) 29

- The electric dipole moment of the  $Ar_2-OCX$  ( $X = O, S$ ) complexes, D. Consalvo and J. Gripp 249 (1999) 41

*-microwave*

- The electric dipole moment of the  $Ar_2-OCX$  ( $X = O, S$ ) complexes, D. Consalvo and J. Gripp 249 (1999) 41

*-infrared*

- A new interpretation of the IR spectrum of  $H(D)Cl$  complexed with dimethyl ether from a supersonic jet-FTIR experiment, P. Asselin, P. Soulard, M.E. Alikhani and J.P. Perchard 249 (1999) 73

- DFT calculation and matrix isolation FTIR studies on the formation of  $\text{CF}_3\text{OBr}$  from  $\text{O}(^1\text{D})$  and  $\text{CF}_3\text{Br}$  in solid argon, L. Zhang, X. Wang, M. Chen and Q.-z. Qin 249 (1999) 161
- The peroxy radical ammonia complex. A matrix isolation study, A. Engdahl and B. Nelander 249 (1999) 215
- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201
- UV*
- Radiative and nonradiative electron transfer in donor–acceptor phenoxazine and phenothiazine derivatives, P. Borowicz, J. Herbich, A. Kapturkiewicz, M. Opallo and J. Nowacki 249 (1999) 49
- The electronic states of propyne studied by optical (VUV) absorption, near-threshold electron energy-loss (EEL) spectroscopy and ab initio multi-reference configuration interaction calculations, M.H. Palmer, C.C. Ballard and I.C. Walker 249 (1999) 129
- Absolute oscillator strengths for hydrogen sulphide. II. Ionic photofragmentation and photoionization in the valence shell continuum regions (10–60 eV), R. Feng, G. Cooper and C.E. Brion 249 (1999) 223
- visible*
- Delayed luminescence of the ladder-type methyl-poly(*para*-phenylene), Yu.V. Romanovskii, A. Gerhard, B. Schweitzer, R.I. Personov and H. Bässler 249 (1999) 29
- Radiative and nonradiative electron transfer in donor–acceptor phenoxazine and phenothiazine derivatives, P. Borowicz, J. Herbich, A. Kapturkiewicz, M. Opallo and J. Nowacki 249 (1999) 49
- Frenkel excitons in disordered chromophore complexes: Theory of optical absorption of Langmuir–Blodgett layers including pheophorbide-a, R. Scheller and V. May 264 (1999) 191
- Photoelectron and Auger spectroscopy*
- Site-specific phenomena in Si:2p core-level photoionization of  $\text{X}_3\text{Si}(\text{CH}_2)_n\text{Si}(\text{CH}_3)_3$  ( $\text{X} = \text{F}$  or  $\text{Cl}$ ,  $n = 0–2$ ) condensed on a Si(111) surface, S. Nagaoka, K. Mase, M. Nagasono, S. Tanaka, T. Urisu, J. Ohshita and U. Nagashima 249 (1999) 15
- Multiphoton ionization*
- The ultraviolet photodissociation dynamics of IBr studied using state-selective translational spectroscopy, W.S. McGivern, R. Li, P. Zou, T. Nguyen and S.W. North 249 (1999) 237
- X-ray spectroscopy*
- Nitrogen and oxygen core excitations in solid  $\text{NaNO}_2$  studied by X-ray absorption and resonant photoemission, A.S. Vinogradov, A.B. Preobrajenski, S.L. Molodtsov, S.A. Krasnikov, R. Szargan, A. Knop-Gericke and M. Hävecker 249 (1999) 249
- Electron impact spectroscopy*
- Absolute oscillator strengths for hydrogen sulphide. II. Ionic photofragmentation and photoionization in the valence shell continuum regions (10–60 eV), R. Feng, G. Cooper and C.E. Brion 249 (1999) 223
- Laser induced fluorescence*
- Delayed luminescence of the ladder-type methyl-poly(*para*-phenylene), Yu.V. Romanovskii, A. Gerhard, B. Schweitzer, R.I. Personov and H. Bässler 249 (1999) 29

- Protonation kinetics of GFP and FITC investigated by FCS — aspects of the use of fluorescent indicators for measuring pH, J. Widengren, B. Terry and R. Rigler 249 (1999) 259

#### *Ultrafast measurements*

- Photoinduced electron transfer between dimethylaniline and oxazine 1 in micelles, S.K. Pal, D. Mandal, D. Sukul and K. Bhattacharyya 249 (1999) 63

#### *Synchrotron spectroscopies*

- The electronic states of propyne studied by optical (VUV) absorption, near-threshold electron energy-loss (EEL) spectroscopy and ab initio multi-reference configuration interaction calculations, M.H. Palmer, C.C. Ballard and I.C. Walker 249 (1999) 129

#### *Atomic and molecular beam techniques*

- A new interpretation of the IR spectrum of H(D)Cl complexed with dimethyl ether from a supersonic jet-FTIR experiment, P. Asselin, P. Soulard, M.E. Alikhani and J.P. Perchard 249 (1999) 73

#### *Calorimetric methods*

- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201

## **Objects**

### **Bulk systems**

#### *Gases*

- A semiclassical study of vibrational and rotational transition in He + H<sub>2</sub> at suprathreshold energies, K. Sakimoto 249 (1999) 1

#### *Supersonic beams*

- A new interpretation of the IR spectrum of H(D)Cl complexed with dimethyl ether from a supersonic jet-FTIR experiment, P. Asselin, P. Soulard, M.E. Alikhani and J.P. Perchard 249 (1999) 73  
The ultraviolet photodissociation dynamics of IBr studied using state-selective translational spectroscopy, W.S. McGivern, R. Li, P. Zou, T. Nguyen and S.W. North 249 (1999) 237

#### *Liquid mixtures and solutions*

- Radiative and nonradiative electron transfer in donor–acceptor phenoxazine and phenothiazine derivatives, P. Borowicz, J. Herbich, A. Kapturkiewicz, M. Opallo and J. Nowacki 249 (1999) 49

#### *Crystals*

- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201

*-neat*

- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201

*Glasses*

- Superposition model for  $^{19}\text{F}$  isotropic chemical shift in ionic fluorides: from basic metal fluorides to transition metal fluoride glasses, B. Bureau, G. Silly, J.Y. Buzaré and J. Emery 249 (1999) 89

*Complex fluids**-micelles*

- Photoinduced electron transfer between dimethylaniline and oxazine 1 in micelles, S.K. Pal, D. Mandal, D. Sukul and K. Bhattacharyya 249 (1999) 63

*Polymers*

- Delayed luminescence of the ladder-type methyl-poly(*para*-phenylene), Yu.V. Romanovskii, A. Gerhard, B. Schweitzer, R.I. Personov and H. Bässler 249 (1999) 29

*Thin films*

- Frenkel excitons in disordered chromophore complexes: Theory of optical absorption of Langmuir–Blodgett layers including pheophorbide-a, R. Scheller and V. May 249 (1999) 191

*Surfaces*

- Site-specific phenomena in Si:2p core-level photoionization of  $\text{X}_3\text{Si}(\text{CH}_2)_n\text{Si}(\text{CH}_3)_3$  ( $\text{X} = \text{F}$  or  $\text{Cl}$ ,  $n = 0-2$ ) condensed on a Si(111) surface, S. Nagaoka, K. Mase, M. Nagasono, S. Tanaka, T. Urisu, J. Ohshita and U. Nagashima 249 (1999) 15

*Dielectrics*

- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201

**Microscopic and mesoscopic systems***Single atoms, molecules and assemblies (incl. biological)*

- A universal basis set for cations and anions generated with the generator coordinate Hartree–Fock method, F.E. Jorge and P.A. Fantin 249 (1999) 105

*Molecules (neutral and ionic)*

- Theoretical studies of dissociation pathways on the ground state potential energy surface for  $\text{HXGeO}$  ( $\text{X} = \text{H}, \text{F}, \text{Cl}$ , and  $\text{Br}$ ), C.-L. Lin, M.-D. Su and S.-Y. Chu 249 (1999) 145
- Theoretical study of the electron-spin magnetic moments ( $g$ -factors) of  $\text{F}_2^-$  and  $\text{Cl}_2^-$  ( $\text{X}_2^-$ ), as well as  $\text{MX}_2$  and  $\text{M}_2\text{X}_2^+$  compounds with  $\text{M} = \text{Li}, \text{Na}$ , P.J. Bruna and F. Grein 249 (1999) 169
- Alignment determination of symmetric top molecule using rotationally resolved LIF, S.-L. Cong, K.-L. Han and N.-Q. Lou 249 (1999) 183

- Nitrogen and oxygen core excitations in solid  $\text{NaNO}_2$  studied by X-ray absorption and resonant photoemission, A.S. Vinogradov, A.B. Preobrajenski, S.L. Molodtsov, S.A. Krasnikov, R. Szargan, A. Knop-Gericke and M. Hävecker 249 (1999) 249
- diatomic*
- A semiclassical study of vibrational and rotational transition in  $\text{He} + \text{H}_2$  at suprathreshold energies, K. Sakimoto 249 (1999) 1
- The ultraviolet photodissociation dynamics of  $\text{IBr}$  studied using state-selective translational spectroscopy, W.S. McGivern, R. Li, P. Zou, T. Nguyen and S.W. North 249 (1999) 237
- small polyatomics*
- Site-specific phenomena in  $\text{Si} 2p$  core-level photoionization of  $\text{X}_3\text{Si}(\text{CH}_2)_n\text{Si}(\text{CH}_3)_3$  ( $\text{X} = \text{F}$  or  $\text{Cl}$ ,  $n = 0-2$ ) condensed on a  $\text{Si}(111)$  surface, S. Nagaoka, K. Mase, M. Nagasono, S. Tanaka, T. Urisu, J. Ohshita and U. Nagashima 249 (1999) 15
- The electronic states of propyne studied by optical (VUV) absorption, near-threshold electron energy-loss (EEL) spectroscopy and ab initio multi-reference configuration interaction calculations, M.H. Palmer, C.C. Ballard and I.C. Walker 249 (1999) 129
- Absolute oscillator strengths for hydrogen sulphide. II. Ionic photofragmentation and photoionization in the valence shell continuum regions (10–60 eV), R. Feng, G. Cooper and C.E. Brion 249 (1999) 223
- Structure, bonding and formation of molecular germanium oxides, hydroxides and oxyhydroxides, J.R.T. Johnson and I. Panas 249 (1999) 273
- aromatics*
- Radiative and nonradiative electron transfer in donor–acceptor phenoxazine and phenothiazine derivatives, P. Borowicz, J. Herbich, A. Kapturkiewicz, M. Opallo and J. Nowacki 249 (1999) 49
- Molecular aggregates*
- The electric dipole moment of the  $\text{Ar}_2\text{--OCX}$  ( $\text{X} = \text{O}, \text{S}$ ) complexes, D. Consalvo and J. Gripp 249 (1999) 41
- Frenkel excitons in disordered chromophore complexes: Theory of optical absorption of Langmuir–Blodgett layers including pheophorbide-a, R. Scheller and V. May 249 (1999) 191
- van der Waals molecules*
- The aniline–argon van der Waals complex: ab initio second-order Møller–Plesset study of the potential energy surface in the ground electronic state, I. López-Tocón, J.C. Otero, M. Becucci, G. Pietraperzia and E. Castellucci 249 (1999) 113
- clusters*
- The electric dipole moment of the  $\text{Ar}_2\text{--OCX}$  ( $\text{X} = \text{O}, \text{S}$ ) complexes, D. Consalvo and J. Gripp 249 (1999) 41
- Theoretical studies on the electronic spectrum of linear  $\text{C}_6$ , M. Hanrath, S.D. Peyerimhoff and F. Grein 249 (1999) 121
- Structure, bonding and formation of molecular germanium oxides, hydroxides and oxyhydroxides, J.R.T. Johnson and I. Panas 249 (1999) 273
- complexes*
- The peroxy radical ammonia complex. A matrix isolation study, A. Engdahl and B. Nelander 249 (1999) 215

*Free radicals (incl. hydronium and muonium)*

- Theoretical study of the electron-spin magnetic moments ( $g$ -factors) of  $F_2^-$  and  $Cl_2^-$  ( $X_2^-$ ), as well as  $MX_2$  and  $M_2X_2^+$  compounds with  $M = Li, Na$ , P.J. Bruna and F. Grein 249 (1999) 169

*Proteins*

- Protonation kinetics of GFP and FITC investigated by FCS — aspects of the use of fluorescent indicators for measuring pH, J. Widengren, B. Terry and R. Rigler 249 (1999) 259

**Phenomena***Molecular structure*

- The electric dipole moment of the  $Ar_2-OCX$  ( $X = O, S$ ) complexes, D. Consalvo and J. Gripp 249 (1999) 41
- A new interpretation of the IR spectrum of  $H(D)Cl$  complexed with dimethyl ether from a supersonic jet-FTIR experiment, P. Asselin, P. Soulard, M.E. Alikhani and J.P. Perchard 249 (1999) 73
- The aniline–argon van der Waals complex: ab initio second-order Møller–Plesset study of the potential energy surface in the ground electronic state, I. López-Tocón, J.C. Otero, M. Becucci, G. Pietraperzia and E. Castellucci 249 (1999) 113
- The electronic states of propyne studied by optical (VUV) absorption, near-threshold electron energy-loss (EEL) spectroscopy and ab initio multi-reference configuration interaction calculations, M.H. Palmer, C.C. Ballard and I.C. Walker 249 (1999) 129
- Theoretical studies of dissociation pathways on the ground state potential energy surface for  $HXGeO$  ( $X = H, F, Cl$ , and  $Br$ ), C.-L. Lin, M.-D. Su and S.-Y. Chu 249 (1999) 145
- The peroxy radical ammonia complex. A matrix isolation study, A. Engdahl and B. Nelander 249 (1999) 215
- Structure, bonding and formation of molecular germanium oxides, hydroxides and oxyhydroxides, J.R.T. Johnson and I. Panas 249 (1999) 273

*Vibrations and rotations of molecules*

- A new interpretation of the IR spectrum of  $H(D)Cl$  complexed with dimethyl ether from a supersonic jet-FTIR experiment, P. Asselin, P. Soulard, M.E. Alikhani and J.P. Perchard 249 (1999) 73
- Alignment determination of symmetric top molecule using rotationally resolved LIF, S.-L. Cong, K.-L. Han and N.-Q. Lou 249 (1999) 183
- The peroxy radical ammonia complex. A matrix isolation study, A. Engdahl and B. Nelander 249 (1999) 215

*Electronic structure and states*

- Site-specific phenomena in Si:2p core-level photoionization of  $X_3Si(CH_2)_nSi(CH_3)_3$  ( $X = F$  or  $Cl$ ,  $n = 0-2$ ) condensed on a Si(111) surface, S. Nagaoka, K. Mase, M. Nagasono, S. Tanaka, T. Urisu, J. Ohshita and U. Nagashima 249 (1999) 15
- A universal basis set for cations and anions generated with the generator coordinate Hartree–Fock method, F.E. Jorge and P.A. Fantin 249 (1999) 105
- Theoretical studies on the electronic spectrum of linear  $C_6$ , M. Hanrath, S.D. Peyerimhoff and F. Grein 249 (1999) 121

*Electric and magnetic properties*

- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201

*Spin splittings*

- Theoretical study of the electron-spin magnetic moments ( $g$ -factors) of  $F_2^-$  and  $Cl_2^-$  ( $X_2^-$ ), as well as  $MX_2$  and  $M_2X_2^+$  compounds with  $M = Li, Na$ , P.J. Bruna and F. Grein 249 (1999) 169

*Molecular interactions*

- The aniline–argon van der Waals complex: ab initio second-order Møller–Plesset study of the potential energy surface in the ground electronic state, I. López-Tocón, J.C. Otero, M. Becucci, G. Pietraperzia and E. Castellucci 249 (1999) 113
- Thermally induced rearrangement of hydrogen-bonded helices in solid 4-isopropylphenol as studied by calorimetric, proton NMR, dielectric and near IR spectroscopic methods, G. Wójcik, M.M. Szostak, T. Misiaszek, Z. Pająk, J. Wąsicki, H.A. Kołodziej and P. Freundlich 249 (1999) 201
- The peroxy radical ammonia complex. A matrix isolation study, A. Engdahl and B. Nelander 249 (1999) 215

*Spectral bandshapes and intensities*

- Frenkel excitons in disordered chromophore complexes: Theory of optical absorption of Langmuir–Blodgett layers including pheophorbide-a, R. Scheller and V. May 249 (1999) 191
- Absolute oscillator strengths for hydrogen sulphide. II. Ionic photofragmentation and photoionization in the valence shell continuum regions (10–60 eV), R. Feng, G. Cooper and C.E. Brion 249 (1999) 223

*Energy transfer processes*

- A semiclassical study of vibrational and rotational transition in  $He + H_2$  at suprathreshold energies, K. Sakimoto 249 (1999) 1

*Molecular photophysical processes*

- Photoinduced electron transfer between dimethylaniline and oxazine 1 in micelles, S.K. Pal, D. Mandal, D. Sukul and K. Bhattacharyya 249 (1999) 63
- Absolute oscillator strengths for hydrogen sulphide. II. Ionic photofragmentation and photoionization in the valence shell continuum regions (10–60 eV), R. Feng, G. Cooper and C.E. Brion 249 (1999) 223

*Photochemistry*

- The ultraviolet photodissociation dynamics of IBr studied using state-selective translational spectroscopy, W.S. McGivern, R. Li, P. Zou, T. Nguyen and S.W. North 249 (1999) 237

*Luminescence spectra, yields and lifetimes*

- Delayed luminescence of the ladder-type methyl-poly(*para*-phenylene), Yu.V. Romanovskii, A. Gerhard, B. Schweitzer, R.I. Personov and H. Bässler 249 (1999) 29
- Photoinduced electron transfer between dimethylaniline and oxazine 1 in micelles, S.K. Pal, D. Mandal, D. Sukul and K. Bhattacharyya 249 (1999) 63

*Reactions (incl. dissociation)*

- DFT calculation and matrix isolation FTIR studies on the formation of  $CF_3OBr$  from  $O(^1D)$  and  $CF_3Br$  in solid argon, L. Zhang, X. Wang, M. Chen and Q.-z. Qin 249 (1999) 161
- Structure, bonding and formation of molecular germanium oxides, hydroxides and oxyhydroxides, J.R.T. Johnson and I. Panas 249 (1999) 273

*-isolated molecules*

- DFT calculation and matrix isolation FTIR studies on the formation of  $\text{CF}_3\text{OBr}$  from  $\text{O}(^1\text{D})$  and  $\text{CF}_3\text{Br}$  in solid argon, L. Zhang, X. Wang, M. Chen and Q.-z. Qin 249 (1999) 161
- The ultraviolet photodissociation dynamics of  $\text{IBr}$  studied using state-selective translational spectroscopy, W.S. McGivern, R. Li, P. Zou, T. Nguyen and S.W. North 249 (1999) 237

*Electron transfer*

- Radiative and nonradiative electron transfer in donor–acceptor phenoxazine and phenothiazine derivatives, P. Borowicz, J. Herbich, A. Kapturkiewicz, M. Opallo and J. Nowacki 249 (1999) 49
- Photoinduced electron transfer between dimethylaniline and oxazine 1 in micelles, S.K. Pal, D. Mandal, D. Sukul and K. Bhattacharyya 249 (1999) 63

*Proton and hydrogen atom transfer*

- Protonation kinetics of GFP and FITC investigated by FCS — aspects of the use of fluorescent indicators for measuring pH, J. Widengren, B. Terry and R. Rigler 249 (1999) 259
